China

L/C, T/T

China Supplier Wholesale Cylinder Gas High Purity 99.996% NF3 Gas Nitrogen **Trifluoride**

Basic Information

. Place of Origin: . Brand Name: CMC COA · Certification: NF3 Model Number: • Minimum Order Quantity: 1kg • Price: US \$500/kg Cylinder/Tank · Packaging Details: • Delivery Time: 15 days

. Supply Ability: 20000 Tons/Year

Product Specification

Payment Terms:

• Product Name: Nitrogen Trifluoride

. Melting Point: -206.79 °C -129.0 ºC . Boiling Point: Diss640 Valve:

• Cylinder Pressure: 15MPa/20MPa • Transport Package: Sea Transportation

 Specification: 47L, 440L CMC Trademark: · Origin: China . HS Code: 28129011 • Supply Ability: 5000tons/Year · CAS No.: 7783-54-2 • Formula: NF3 • EINECS: 232-007-1 Industrial Pure Air · Constituent:

Product Description

Product Description

NF3 gas refers to nitrogen trifluoride in its gaseous state. Nitrogen trifluoride (NF3) is a colorless, odorless gas at room temperature and pressure. It is stable and does not react with most common materials. NF3 gas is commonly used in various industrial applications, particularly in the electronics and semiconductor industries.

As mentioned earlier, NF3 gas is used as a cleaning agent in the electronics manufacturing industry to remove residues from silicon wafers, chambers, and other electronic components. It is also employed as a plasma etchant in the semiconductor industry for selectively removing materials during the fabrication process. Additionally, NF3 is used in the production of thin-film photovoltaic cells for solar panels and as a fluorinating agent in chemical reactions.

When working with NF3 gas, it is important to follow appropriate safety measures to ensure personal safety and prevent environmental impact. This includes working in well-ventilated areas or using exhaust systems to prevent the buildup of high concentrations of NF3 gas. Proper protective equipment should be used, including gloves, goggles, and respiratory protection if necessary. NF3 gas should not be released into the environment, and efforts should be made to monitor and reduce emissions due to its high global warming potential.

Overall, NF3 gas plays a significant role in various industries, particularly in the electronics and semiconductor sectors, due to its cleaning and etching properties. However, it is crucial to handle and use NF3 responsibly, following safety guidelines to protect both human health and the environment.

Basic Info

Transport Package: 47L, 440L Melting Point -206.79°C

Trademark: CMC Boiling Point -129.0°C

Specification 99.99%, 99.996% Production Capacity 5000 M3/Year

Cylinder Pressure 15MPa/20MPa Valve Diss640

Appearance Colorless, Odorless Density 2.96 Kg/M3

Specifications:

Specifications	Company Standard
NF3	≥ 99.996%
CF4	≤ 20 ppm
N2	≤ 5 ppm
O2+AR	≤ 3 ppm
CO	≤ 1 ppm
CO2	≤ 0.5 ppm
N2O	≤ 1 ppm
SF6	≤ 2 ppm
Moisture	≤ 1 ppm
Express as HF	≤ 1 ppm

Company

Profile

Shanghai Kemike Chemical Co., Ltd is staffed by trained personnel, combine many years experience in Gas industry .We supply cylinder gas, electronic gas, etc., and the gas holder, panel, valves and fittings and other equipment, parts and engineering services to our customers in China and worldwide; The products are involved in various industrial fields, such as semiconductor chip, solar cell, LED, TFT-LCD, optical fiber, glass, laser, medicine, etc., Our mission is to partner with our global customers to provide support, solutions and quality products that are innovative, reliable, and safe.

Our products mainly include: H2, O2, N2, Ar, CO2, propane, acetylene, helium, laser mixed gas, SiH4, Sih2cl2, SiHCL3, SiCL4, NH3, CF4, NF3, SF6, HCL, N2O, doping mixed gas (TMB, PH3, B2H6) and other electronic gases.
